

Protect and host your data with complete sovereignty, expert management, and absolute trust

Enterprise private cloud hosting with complete data sovereignty and fully managed services, providing flexibility to deploy cloud your way, either dedicated, leveraged, or hybrid. With over 42 years of SAP and enterprise expertise behind every deployment, our iSphere Cloud solution brings you assurance that your data is always within the borders that your business, your board, and your regulators require.

Cost predictability

True data sovereignty

SAP heritage and agnostic power

People-centric partnership

Architecture built for sovereignty and performance

We build your cloud around your requirements; each deployment is dedicated to your organisation, anchored in your chosen jurisdiction, and fully managed by our engineering team across every layer of the stack.

Advanced Services and Landscape Optimisation

- Landscape Optimisation
- Compliance services
- Advanced networking
- Advanced security

Assessment and Migration Services

- Cold, warm and live migration
- Optional services

SAP Cloud

- SAP S/4HANA
- SAP Business One
- SAP certified design

Managed hybrid and multi-cloud

From dedicated private infrastructure, owned by you, or by EPI-USE Labs, to leveraged private cloud consumed as a service, or fully managed Microsoft Azure for organisations with existing public cloud investments, we deliver the full spectrum of enterprise cloud models under one managed service. Whatever your requirements, our engineering team takes ownership of every layer, so your business never has to.

Dedicated Private Cloud

- Private Cloud on dedicated infrastructure, owned by you, or by EPI-USE Labs
- We manage all licence consumption and reporting
- Hosted in your own, a Partner or co-location facility
- Full Infrastructure-as-a-Service Managed Services included
- Networking, security, and Operating System management end-to-end

Hybrid and Leveraged Cloud

- Private cloud on EPI-USE Labs-owned shared infrastructure
- Consumed as a service via self-service portal
- Hosted in Partner or co-location facility
- Consumption-based billing; pay for what you use
- Infrastructure-as-a-Service with hypervisor layer
- Full Managed Services support included

Managed Public Cloud

- Bring your own (BYO) tenant or fully EPI-USE Labs-managed Azure environment
- Complete SAP on Azure Managed Service available
- Azure migrations and landscape modernisation
- Ongoing cost management and rightsizing
- Operating System, networking, and security management included

Backup-as-a-Service

- Fully managed backup on dedicated infrastructure
- We handle all licensing, monitoring, and reporting
- Flexible retention policies to meet compliance requirements
- Fast, on-demand restores as standard
- Hosted in your own, a Partner or co-location facility

Disaster Recovery Services

- Disaster Recovery (DR)-as-a-Service on dedicated or syndicated infrastructure
- We manage all replication and restore operations
- VEEAM replication with automated failover
- Documented DR testing with full reporting
- Hosted in Partner or co-location facility

SAP HANA Cloud

- SAP-certified operations
- HANA-optimised private cloud, shared or dedicated
- Supports SAP S/4HANA, SAP Business One, and classical SAP
- Uniform management of HANA and OS infrastructure
- SAP-certified hosting and HANA operations
- NVMe storage tuned for in-memory workloads

Eight global data centres

Amsterdam · Atlanta · Cape Town · Dallas · Frankfurt · Johannesburg · London · Sydney

Partner facilities

Equinix · Teraco · Fujitsu PRIMEFLEX® SAP-certified architecture | Tier-III+ standards

As a global software solutions and managed services company, EPI-USE Labs helps you to maximise the performance, management and security of your SAP® and SAP SuccessFactors® systems.
